- Individuals with no prior experience

GAIN IN-DEMAND SKILLS TO INNOVATE & TRANISITION INTO THE SPACE SECTOR

Bridging the Skills Gap in Space Technology

This Bootcamp addresses the shortage of commercial and technical skills needed for businesses to access and thrive in the fast-expanding space industry.

What the course covers

Introduction to Space
Core understanding of space environments, satellites, exploration and career pathways

Industry Upstream & Downstream
Insight into launch systems, ground segments, earth observation, GPS, weather and telecoms applications

ISAM
Exploring in-orbit servicing, robotics, advanced manufacturing and future opportunities

QSPAICE
How space connects with cyber security, quantum technologies and artificial intelligence

Project Management
Practical skills to plan, manage and deliver successful space projects and missions

Global Industry Overview
Global trends, regional markets, supply chains and emerging opportunities

Business Opportunities
Identifying opportunities in the Space Economy, with strategy, risk and sustainability in focus

Pivot to Space
Guidance to create strong business cases, prepare pitches, access funding and drive ROI

Funding

Employed? Your employer usually funds. Employer? It's a subsidised and valuable investment.

- Self-employed and unemployed: Free
- Small businesses (under 250 employees): Total cost £396 per employee
- Large businesses (250+ employees): Total cost £1,188 per employee

Prices exclude VAT.

Course Delivery

Eight tutor led days run 09:00 to 17:00, delivered remotely via Teams with some sessions available face to face.
